About Us

Intellerzone is a digital platform that stands out with its intellectual spirit and community-driven structure, offering content in diverse areas such as art, music, science, culture, life, and mysticism.

The platform initially started in 2020 as a music blog named MoonCityTunes. After two years of publishing, it was shut down in 2022. In 2024, it was reborn with a stronger vision and a new identity, officially launching as Intellerzone on December 1, 2024.

Its founder, Ayçe Mısırlılar (stage name Alexa Moon), is a female entrepreneur who combines engineering and music. Her goal is to create a space where artists, creators, and entrepreneurs can amplify their voices more effectively.
